

La Haie Sainte

Drawn to 1/900

- Cut out the building as one piece
- The outer walls should be folded up
- Fold in and stick the corner tabs
- From the top of the roof line, fold down the outside wall
- Fold the North East wall section along its red top tiles
- Cut away any excess paper from around the building and roofs.

These designs have been donated by subscriber Jeff Brown, who says "With a ground scale of 1/900 I find that they fit in with the movement distances and firing ranges of most rules for 6mm to 20mm figures. Although the larger figures look somewhat odd, at least these vital buildings can be incorporated in a Waterloo wargame without the building covering half the table, and taking troops hours to circumnavigate."

A good point, but the scale purist can also download these designs from our website at www.miniaturewargames.co.uk and resize the PDF to whatever size they prefer.

Thank you Jeff!
