What Beast Left These?

Prep:

- 1) Cut out the Bones below or download the Bone sheet from [link]
- 2) Glue them to some sort of stiff board (cereal boxes work great)

Alternatively players can point at the Bones while describing their Beast.

To Play:

The player characters have stumbled upon the Bones of some unknown but assuredly ancient Beast. Legends speak of it and any adventurer worth their salt has heard those tales... you just can't quite agree on which one it is.

Take it in turns to describe the Beast by assembling a skeleton out of the Bones, saying what its name is, and what the Bones clearly show.

In the end, perhaps you will have stumbled upon some truth to the Bones or maybe the Necromancer can bring your monstrosity to life. Nevertheless, use this as an opportunity to roleplay and to world-build together.
